Intelligent automation

We're ready for **the future**

Do you know how robotic process automation and artificial intelligence create efficiency and speed?

At UBS, intelligent automation actually drives our business! We have over 1,200 live robots, and we're looking to do even more to keep us competitive in a digitalized world.

Join our online workshop to meet experts from our technology and operations departments, and explore how to build automations that power global financial institutions.

We're more than ourselves.

Register via WebEx link directly OR scan this QR code.
